

The Challenge

If you or someone you love is a Veteran who requires assistance with transferring in and out of bed, or to and from the bathroom, you know the challenges. **Next Health** offers the **AgileLife™ Transfer & Mobility System** (“TMS”), the only “Zero Lift” transfer and repositioning system that can result in better outcomes for immobile individuals, their families, caregivers and other providers.

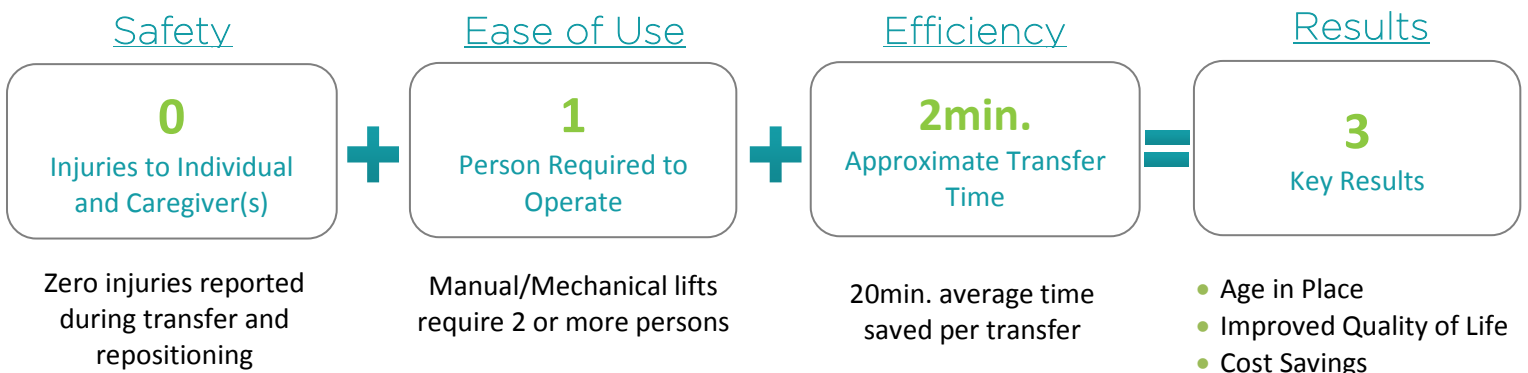

Simply Solving Complex Needs for Veterans

The **AgileLife™ Transfer and Mobility System** from **Next Health** integrates multiple components and technologies to create an innovative solution that virtually eliminates caregiver lifting, patient discomfort, risks of immobility related complications and “Never Events”. The AgileLife™ TMS includes:

- ✓ A full powered hospital type bed, a wheelchair, a docking and transfer system that gently moves an individual to or from the bed to the wheelchair in approximately 2 minutes.
- ✓ An in-bed repositioning system that saves significant time and virtually eliminates pulling and tugging when moving an individual up in bed.
- ✓ A wheelchair that converts to a commode to reduce the need for challenging and time consuming bathroom transfers.
- ✓ A tilt-in-space wheelchair that minimizes spinal compression.
- ✓ Optional therapeutic mattresses, wheelchair seat cushions and supports to help prevent and heal pressure ulcers and provide required trunk support.
- ✓ An in-bed scale to provide regular weighing without transferring to a detached scale.
- ✓ 24/7 system usage data tracking.
- ✓ Optional bed alarm system.

AgileLife™ by the Numbers

Benefits

Patient:

- Cost effective for homecare
- Allows one to “Age in Place”
- Can facilitate frequent movement which can help reduce risk of pressure ulcers
- Mitigates risk of fall during patient transfer
- Restores dignity
- Promotes independence

Caregiver:

- Reduces risk of caregiver injury
- Safe, easy to use system
- Improves caregiver quality of life
- Less time transferring and repositioning helps create more time for other activities

Home Care Agency:

- Improves safety for client and staff
- Allows for single person transfer
- Allows more time for care delivery
- Can improve staff satisfaction
- Increases Client satisfaction

Customer Support

Training:

- Designated Account Manager
- “Hands On” training
- Quick reference cards
- User manual

Customer Support:

- Customer Support Line provided
- Remote system monitoring
- Designated Account Manager

Field Support:

- Proactive maintenance
- Service calls are typically made within 24hrs

Data Analytics:

- 24/7 Patient & System data tracking
- Performance metrics

Where We Have Been

The AgileLife TMS has been in a variety of settings:

- ✓ Private Homes
- ✓ Assisted Living Facilities
- ✓ Group Homes
- ✓ Skilled Nursing Facilities
- ✓ Rehabilitation Facilities
- ✓ Hospitals

Success Measured Over Time

System and client use was continually recorded over a twelve month period with the following results:

Client Testimonials

“Our Client had been in a long term care facility for 2 years and wanted to return to her home. She would not have been able to go home without the AgileLife system.” *Care Manager*

“The worry that my ability to continue caring for him in our home without prohibitively expensive caregiving became overwhelming. The amount of time and energy needed to take care of him was taking a toll on me... When we heard of the AgileLife System we thought it was a prayer finally answered. All of the strain and worry that comes with using a mechanical lift has been eliminated for both of us. The ease of transfer allows him to move as frequently as needed. Having the flexibility to move in and out of bed allows us to adjust our activities so that he can participate.” *Wife of Client at Home*

“The AgileLife has been a “game changer” for me. The mechanical lift caused extreme pain and the AgileLife is very comfortable. I felt a sense of freedom when this came and can’t say enough about it.” *Client*

“My mom loves it! Now she can spend the better part of her day out of bed.” *Daughter of Client in Assisted Living Facility*
